64. (New)   A method for providing a user selectable check-it-later function to a hyperlink on a page displayed in a browser window, the page having at least one hyperlink, the method comprising:

with a single user action:

(i)   creating a check-it-later browser window; and

(ii)   copying a user selected hyperlink into the check-it-later browser window; and

in response to a click event, proximate the user selected hyperlink in the check-it-later browser window, displaying a check-it-later page associated with the user selected hyperlink.

65. (New)   The method of claim 64, wherein the displaying step displays the check-it-later page associated with the user selected hyperlink in a new browser window.

66. (New)   The method of claim 64, wherein the step of creating the check-it-later browser window comprises:

checking for the check-it-later browser window; and

if no check-it-later browser window is open, then opening the check-it-later browser window.

67. (New)   The method of claim 64, wherein the copying step comprises:

capturing URL data for the user selected hyperlink;

creating a clickable item in the check-it-later browser window; and

associating the URL data with the clickable item.

68. (New)   The method of claim 67, wherein the clickable item is a clickable label.

69. (New)   The method of claim 67, wherein the clickable item is a clickable image.

70. (New)   A method for providing a user selectable check-it-later function to a hyperlink in a page displayed in a browser window, the page having at least one hyperlink, the method comprising:

displaying a toolbar;

with a single user action on the toolbar:

(i)   creating a check-it-later browser window; and

(ii)   copying a user selected hyperlink into the check-it-later browser window; and

in response to a click event, proximate the user selected hyperlink in the check-it-later browser window, displaying a check-it-later page associated with the user selected hyperlink.

71. (New)   A method for providing a user selectable anchor-current-page function to a first page displayed in a first browser window, the first page having at least one hyperlink, the method comprising:

with a single user action:

(i)   creating an anchor browser window;

- 3 -

TECH/117890   (09/594,786)

(ii)   creating an anchor hyperlink that represents a URL of the first page in the anchor browser window; and

(iii)   opening a second page associated with a selected hyperlink in the first browser window; and

in response to a click event proximate the anchor hyperlink, opening the first page in a browser window.

72. (New)   The method of claim 71, wherein the browser window is the first browser window.

73. (New)   The method of claim 71, wherein the browser window is a second browser window.

74. (New)   The method of claim 71, wherein the browser window is a new browser window.

75. (New)   The method of claim 71, wherein the creating an anchor hyperlink step comprises:

capturing URL data for the first page;

creating a clickable item in the anchor browser window; and

associating the URL data with the clickable item.

76. (New)   The method of claim 75, wherein the clickable item is a clickable label.

(09/594,786)

77. (New) The method of claim 75, wherein the clickable item is a clickable image.

78. (New) A method for providing a user selectable anchor-current-page function to a first page displayed in a current browser window, the first page having at least one hyperlink, the method comprising:

displaying a toolbar

with a single user action on the toolbar:

(i) creating an anchor browser window;

(ii) creating an anchor hyperlink that represents a URL of the first page in the anchor browser window; and

(iii) opening a second page associated with a selected hyperlink in the current browser window; and

in response to a click event proximate the anchor hyperlink, opening the first page in the current browser window.

79. (New) A method for providing at least one user selectable function to a page displayed in a current browser window, the method comprising:

displaying a toolbar, the toolbar displaying at least one user selectable function;

in response to a user's selection of a function, calling the selected function,

wherein the at least one user selectable function is selected from the group comprising: open in new window-with window minimized, check it later, or anchor current page.

80. (New)   The method of claim 79 wherein the step of calling the selected function comprises:

opening the page associated with the selected link in a new browser window; and

minimizing the new browser window without any user action.

81. (New)   The method of claim 79 wherein the step of calling the selected function comprises:

creating a clickable item in a list window;

associating the selected hyperlink with the clickable item; and

in response to a click event, proximate the clickable item, opening a browser window with a URL of the selected hyperlink.

82. (New)   The method of claim 81, wherein the step of creating a clickable item creates a clickable label.

83. (New)   The method of claim 81, wherein the step of creating a clickable item creates a clickable image.

84. (New)   The method of claim 81, wherein the browser window is the current browser window.

85. (New)   The method of claim 81, wherein the browser window is a new browser window.

86. (New)   The method of claim 79 wherein the step calling the selected function comprises:

(09/594,786)

creating clickable item in a window;

associating the hyperlink of the current page with the clickable item;

opening a user selected page associated with the user selected hyperlink; and

in response to a click event proximate the clickable item, opening a browser window with a URL of the hyperlink associated with the clickable item.

87. (New)   The method of claim 86, wherein the step of creating a clickable item creates a clickable label.

88. (New)   The method of claim 86, wherein the step of creating a clickable item creates a clickable image.

89. (New)   The method of claim 86, wherein the browser window is the current browser window.

90. (New)   The method of claim 86, wherein the browser window is a new browser window.

91. (New)   A method for providing at least one user selectable function to a first page displayed in a current browser window, the method comprising:

displaying a toolbar without the user executing a click event, the toolbar displaying at least one user selectable function;

in response to a users selection of a function, calling the selected function.

92. (New)   The method of claim 91 wherein the step of calling the selected function comprises:

(09/594,786)

opening a selected page associated with the selected link in a new browser window.

93. (New)   The method of claim 92 wherein the step of calling the selected function further comprises:

minimizing the new browser window without any user action.

94. (New)   The method of claim 91 wherein the step of calling the selected function comprises:

creating a clickable item in a window;

associating a selected hyperlink with the clickable item; and

in response to a click event, proximate the clickable item, opening a browser window with a URL of the selected hyperlink.

95. (New)   The method of claim 94, wherein the step of creating a clickable item creates a clickable label.

96. (New)   The method of claim 94, wherein the step of creating a clickable item creates a clickable image.

97. (New)   The method of claim 94, wherein the browser window is the current browser window.

98. (New)   The method of claim 94, wherein the browser window is a new browser window.

- 8 -

(09/594,786)

99. (New)   The method of claim 91 wherein the step of calling the selected function comprises:

creating clickable item in a window;

associating a first page hyperlink with the clickable item;

opening a selected page associated with a selected hyperlink; and

in response to a click event proximate the clickable item, opening the first page in a browser window.

100. (New)   The method of claim 99, wherein the step of creating a clickable item creates a clickable label.

101. (New)   The method of claim 99, wherein the step of creating a clickable item creates a clickable image.

102. (New)   A method for providing at least one user selectable function to a page displayed in a current browser window, the method comprising:

displaying a toolbar if a pointer is proximate a selected hyperlink for a time period which exceeds a predetermined time, the toolbar displaying at least one user selectable function;

in response to a users selection of a function, calling the selected function.

103. (New)   The method of claim 102 wherein the step of calling the selected function comprises:

opening a selected page associated with the selected hyperlink in a new browser window.

- 9 -   (09/594,786)

104. (New) The method of claim 103 wherein the step of calling the selected function further comprises:

minimizing the new browser window without any user action.

105. (New) The method of claim 102 wherein the step of calling the selected function comprises:

creating a clickable item in a window;

associating the selected hyperlink with the clickable item; and

in response to a click event, proximate the clickable item, opening a page with a URL of the selected hyperlink in a browser window.

106. (New) The method of claim 105, wherein the step of creating a clickable item creates a clickable label.

107. (New) The method of claim 105, wherein the step of creating a clickable item creates a clickable image.

108. (New) The method of claim 102 wherein the step of calling the selected function comprises:

creating a clickable item in a window;

associating a URL of the current page with the clickable item;

opening a selected page associated with the selected hyperlink; and

in response to a click event proximate the clickable item, opening a browser window with the URL associated with the clickable item.

- 10 -

(09/594,786)

109. (New) The method of claim 108, wherein the step of creating a clickable item creates a clickable label.

110. (New) The method of claim 108, wherein the step of creating a clickable item creates a clickable image.

111. (New) A method for providing a page having one or more hyperlinks to a browser, the method comprising:

receiving a request for the page from the browser;

associating at least one function with the page; and

transmitting a modified page to the browser,

wherein the function is operable to create and manage an interface on a displayed page, and wherein the interface provides a user of the browser with at least one user selectable function.

112. (New) The method of claim 111 wherein the user selectable function comprises:

opening a selected page associated with a selected link in a new browser window.

113. (New) The method of claim 112 wherein the user selectable function further comprises:

minimizing the new browser window without any user action.

(09/594,786)

114. (New)   The method of claim 111 wherein the user selectable function comprises:

creating a clickable item in a window;

associating a selected hyperlink with the clickable item; and

in response to a click event, proximate the clickable item, opening the selected page with the selected hyperlink in a browser window.

115. (New)   The method of claim 114, wherein the step of creating a clickable item creates a clickable label.

116. (New)   The method of claim 114, wherein the step of creating a clickable item creates a clickable image.

117. (New)   The method of claim 111 wherein the user selectable function comprises:

creating clickable item in a window;

associating a URL of a current page with the clickable item;

opening a selected page associated with the selected hyperlink; and

in response to a click event proximate the clickable item, opening a browser window with the URL associated with the clickable item.

118 (New)   The method of claim 117, wherein the step of creating a clickable item creates a clickable label.

(09/594,786)

119. (New)   The method of claim 117, wherein the step of creating a clickable item creates a clickable image.

120. (New)   A method for providing a page having one or more hyperlinks to a browser, the method comprising:

receiving a request for the page from the browser;

associating at least one function with the page;

associating at least one user selectable function with at least one hyperlink; and

transmitting a modified page to the browser,

wherein the function is operable to create and manage an interface on a displayed page, and wherein the interface provides a user of the browser with the at least one user selectable function.

121. (New)   The method of claim 120 wherein the user selectable function comprises:

opening a selected page associated with the selected link in a new browser window.

122. (New)   The method of claim 121 wherein the step of calling the selected function further comprises:

minimizing the new browser window without any user action.

123. (New)   The method of claim 120 wherein the user selectable function comprises:

creating a clickable item in a window;
